Thin groups and superstrong approximation
MSRI Publications
Volume **61**, 2013

Contents

Preface ix

Some Diophantine applications of the theory of group expansion 1
JEAN BOURGAIN

A brief introduction to approximate groups 23
EMMANUEL BREUILLARD

Superstrong approximation for monodromy groups 51
JORDAN S. ELLENBERG

The ubiquity of thin groups 73
ELENA FUCHS

The orbital circle method 93
ALEX V. KONTOROVICH

Sieves in discrete groups, especially sparse 107
EMMANUEL KOWALSKI

How random are word maps? 141
MICHAEL LARSEN

Constructing thin groups 151
DARREN LONG AND ALAN W. REID

Ergodic properties of the Burger–Roblin measure 167
AMIR MOHAMMADI

Harmonic analysis, ergodic theory and counting for thin groups 179
HEE OH

Generic elements in Zariski-dense subgroups and isospectral locally symmetric spaces 211
GOPAL PRASAD AND ANDREI RAPINCHUK

Growth in linear groups 253
LÁSZLÓ PYBER AND ENDRE SZABÓ

Strong approximation for algebraic groups 269
ANDREI RAPINCHUK

Generic phenomena in groups: some answers and many questions 299
IGOR RIVIN

Affine sieve and expanders 325
ALIREZA SALEHI GOLSEFIDY
Notes on thin matrix groups 343
PETER SARNAK
